

A+nywhere Learning System[®]

Media Pack Video Supplements

Video content helps teachers generate more student interest in over 650 A+LS[™] lessons.

Through a partnership with CLEARVUE & SVE, American Education Corporation has integrated more than 650 video clips of engaging content to enrich the learning experience in the *A+nyWhere Learning System*[®]. As a supplemental video component to 32 of the *A+LS*[™] Social Sciences, Science and Language Arts titles, this tool actively engages students in the learning process.

For more than 85 years, CLEARVUE & SVE has led the industry as a publisher of educational content videos. The curriculum-based videos help students better understand important concepts and core ideas in their studies while engaging them with colorful and exciting visual content.

For example, a Life Sciences lesson comes alive when students see the flow of blood platelets through the arteries. Ancient Greek Philosophy is easier to grasp in a World Literature lesson with a video including pictorial descriptions of the time period and background to the philosophies. Detailed video instruction explaining how to build and maintain a terrarium adds an interactive element to an Earth Sciences lesson. Added to the extensive curriculum in *A+LS* for grades one through 12, these 650+ video clips, which are incorporated into the titles listed below, strengthen the standards-based lessons and enhance each student's learning process.

A+LS Video Supplement Title List

Social Science

Social Science I
